

Descriptive Device

Privacy Screen

EC298-BEB

EC298-CLB

1. Products:

The aluminum privacy screens assembled, according to Ramp-Art manufacturer's standards, are consistent with the regulations of the Ontario Building Code applicable.

2. Materials :

2.1 Components

The privacy screens composed of aluminum extrusions alloy 6063-T5.

The glass panels are tempered or laminated and are in compliance with safety requirements of the glass. They are inserted into the aluminum moldings using a flexible vinyl trim.

The framework dimension is 38mm x 38mm.

Internal connector sleeves shall be of extruded aluminum.

2.2 Privacy screen finish

The privacy screen will have a Duracron® finish, colour to be selected by the architect (from our chart). Also available : Acrynar®, Duranar®, Duranar® XL, anodized and powder coating.

2.3 Bindings

All wedge anchors shall be stainless steel type 304.

The assembly hardware is in stainless steel.

3. Fabrication/Installation :

The Ramp-Art aluminum privacy screens will be delivered on the job site in pre-assembled elements and will be installed according to the plans and are conformed to the manufacturer's instructions.

All the measurements will be taken on the job site before the fabrication is made.

4. Submittals:

Submit shop drawings, sealed by a professional engineer.

Indicate materials, dimensions, core thicknesses, finishes, connections, joints method of anchorage, number of anchors, supports, details, accessories and relationship to adjacent work.
